

MULTIFUNCTIONAL CAKE ULTRASONIC CUTTING MACHINE

Specially For Bakery Industry

The Ultrasonic Multifunctional Cake Cutting Machine offers three main functions: cutting single-round, square, and rectangular cakes. This advanced food cutting solution uses high-frequency ultrasonic vibrations to deliver clean, precise, and uniform cuts. It is specially designed to handle sticky, frozen, delicate, and soft bakery products without crushing, tearing, or deformation. The machine efficiently processes all three cake formats, ensuring smooth edges and consistent portion sizes. Ideal for bakeries and food manufacturing units, it provides reliable semi-automatic operation while maintaining high hygiene standards with its food-grade construction.

SPECIFICATION

Operating Temperature During Cutting	5°C to 10°C
Cutting Shape	Squares, Rectangles, Round Cake (Single Cake)
Cutting Tray Size	Tray 600 mm x 600 mm x 60 mm
Capacity	High cutting efficiency and fastest with 2 knife
Frequency	20 kHz
Watts	2 KW (Each Cutter)
Voltage	AC 230 V, 50/60 Hz, 16 Amp
Cutting Length	610 mm
Ultrasonic Knife	305 mm x 2 pieces
Cutter Material	Titanium (Food Grade)
Cutting Height	Up to 70 mm
Power Consumption	5 KW
Cutter Type	Standard

Cutting Shape & Tray Size

Cutting Base Plate	600 mm X 600 mm
Cutting Shape 1	Square
Cutting Shape 2	Rectangle
Cutting Shape 3	Round Cake (Single Cake)
Frame and Body	Stainless Steel (SS) and Aluminium
Machine Weight (Approx.)	500 kg
Machine Base	SS pad
Overall Dimensions (Approx.)	Dimensions (Approx.)

FEATURES

1. Equipped with 3 Adjustable Cutting functions.
 2. Suitable for Multi-Product Slicing.
 3. Easy-to-Move Design.
 4. Operates on a single-phase power supply.
 5. Advanced PLC Controller for Precision Control.
 6. Rotating Slab Mechanism for Efficient Cutting.
- Built with Food-Grade Cutter for Hygiene & Safety.
