

ULTRASONIC BROWNIES CUTTING MACHINE

Specially For Bakery Industry

The Ultrasonic Cake Cutting Machine is a high-performance food-processing solution designed for precise, clean, and consistent cutting of cakes and a wide range of confectionery products. Powered by advanced ultrasonic technology, it ensures smooth, crumb-free cuts while preserving product texture and quality.

Equipped with a programmable cutting system and multiple cutting stations, the machine enables accurate multi-directional slicing with exceptional flexibility. Its adjustable cutting angles allow customised degree settings, making it ideal for diverse product designs and portioning requirements. Specifically engineered for bakeries and confectionery production lines, this system delivers uniform portion sizes, maintains superior hygiene standards, and enhances operational efficiency in high-volume environments. It efficiently handles both square and rectangular cutting with excellent accuracy and consistency, ensuring premium presentation in every batch.

SPECIFICATION

Cutting Tray Size	355mm X 255mm X 40mm
Cutting Capacity	High cutting efficiency and fastest with 1.5-2s/ knife
Frequency	20 kHz
Input Voltage	AC 230 V, 50/60 Hz, 16 Amp
Cutting Length	355 mm
Ultrasonic Knife Size	200mm X 2 Nos & 305mm X 1 Nos
Cutter Material	Titanium (Food Grade)
Maximum Cutting Height	70 mm
Total Power Consumption	7 kW
Cutter Type	Full Wave Length
Frame and Body	SS 304 and Aluminium
Machine Weight	Approx. 1200 kg
Machine Base	SS pads
Overall Dimensions (Approx.)	3500 mm (L) × 1200 mm (W) × 1800 mm (H)
Blade Material	Titanium

FEATURES

1. Preserves Product Texture & Moisture
2. Enhanced Hygiene & Food Safety Standards
3. Versatile for Multiple Food Applications
4. Minimal Product Loss for Higher Yield
5. Equipped with Advanced Sensor Technology
6. Consistent Output for Bulk Production
7. Flexible Cutting Options
8. Dual Shape Cutting Capability
9. Custom Cutting for Every Shape
