

# ULTRASONIC CAKE CUTTING MACHINE FOR SQUARE AND RECTANGULAR SHAPES

*Specially For Bakery Industry*

The Ultrasonic Cake Cutting Machine for Square and Rectangular Shapes features advanced ultrasonic cutting technology, enabling effortless slicing of sticky, frozen, delicate, and hard-to-cut products. It ensures clean, precise cuts for sponge cakes, cheesecakes, brownies, pies, quiches, pizzas, pastries, flapjacks, and a wide range of other food items. Designed to cut square and rectangular formats, the machine can also process half-sheet products directly from the pan. It operates in a reliable and efficient semi-automatic mode.

## SPECIFICATION

Operating Temperature During Cutting	5°C to 10°C
Cutting Shape	Squares, Rectangles
Cutting Tray Size	Tray 600 mm x 600 mm x 60 mm
Capacity	High cutting efficiency and fastest with 2 knife
Frequency	20 kHz
Watts	2 KW per cutter
Voltage	AC 230 V, 50/60 Hz, 16 Amp
Cutting Length	610 mm
Ultrasonic Knife	305 mm x 2 pieces
Cutter Material	Titanium (Food Grade)
Cutting Height	Up to 70 mm
Power Consumption	5 KW
Cutter Type	Standard

## Cutting Shape & Tray Size

Cutting Base Plate	600 mm X 600 mm
Cutting Shape 1	Square
Cutting Shape 2	Rectangle
Touch Panel & Controller	7" HMI & Touch Screen Display
High/low Voltage Protection	Available
Safety Operation	Light Curtain
Frame and Body	Stainless Steel (SS) and Aluminium
Machine Weight (Approx.)	500 kg
Machine Base	SS pad
Overall Dimensions (Approx.)	1200 mm (L) × 1200 mm (W) × 1600 mm (H)

## FEATURES

1. Advanced ultrasonic cutting technology for clean, smooth, and precise slicing.
2. Ideal for sticky, frozen, delicate, and difficult-to-cut food products.
3. Designed specifically for square and rectangular cakes and food items.
4. Capable of cutting half-sheet products directly from the pan.
5. Maintains product shape without crumbling or smearing.
6. Suitable for a wide range of products, including cakes, pastries, and desserts.
7. Semi-automatic operation for consistent performance and higher productivity.
8. Food-grade construction for hygienic and safe food processing.
9. Low maintenance and easy-to-operate design.
