

# ULTRASONIC FOOD CUTTING LINE

*Specially For Bakery Industry*

Ultrasonic Food Cutting Line is an advanced automated food processing system designed for high-precision cutting of products such as cakes, bread, cheese, dairy items, and confectionery products. Using ultrasonic vibration technology, the machine delivers clean, uniform, and accurate cuts while minimising product deformation and sticking. It features programmable X- and Y-axis cutting patterns, multiple cutting stations, and adjustable cutting angles to meet diverse product requirements. Ideal for bakeries, confectionery manufacturers, and dairy processing units, the Ultrasonic Food Cutting Line ensures consistent quality, high hygiene standards, and efficient large-scale production.

## SPECIFICATION

Cutting Tray Size	40 X 60 cm
Capacity	High cutting efficiency and fastest with 1s/knife
Frequency	20 kHz
Input Voltage	AC 230 V, 50/60 Hz, 16 Amp
Cutting Length	305 mm
Ultrasonic Knife Size	305 mm × 4 pieces
Cutter Material	Titanium (Food Grade)
Maximum Cutting Height	70 mm
Total Power Consumption	9 KW
Cutter Type	Half Wave Length
Frame and Body	SS 304 and Aluminium
Machine Weight	800 kg
Machine Base	SS pad
Overall Dimensions (Approx.)	5000 mm (L) × 1250 mm (W) × 1500 mm (H)
Blade Material	Titanium

## FEATURES

1. Advanced ultrasonic cutting technology for clean, smooth, and precise slicing.
2. Designed specifically for square and rectangular cakes and food items.
3. Suitable for a wide range of products, including cakes, pastries, and desserts.
4. Semi-automatic operation for consistent performance and higher productivity.
5. Food-grade construction for hygienic and safe food processing.
6. Low maintenance and easy-to-operate design.
7. Advanced Sensor Integration
