

ULTRASONIC MULTIFUNCTIONAL CAKE CUTTING MACHINE

Specially For Bakery Industry

An Ultrasonic Multifunctional Cake Cutting Machine is a high-precision solution designed for clean, uniform, and efficient cutting of a wide range of bakery and confectionery products. Using advanced ultrasonic vibration technology, it delivers smooth, crumb-free cuts without damaging delicate items such as cakes, pastries, cheesecakes, brownies, and other soft or layered desserts. The machine supports multiple cutting formats, including round, square, rectangular, triangular, slab, and parallelogram portions. With adjustable cutting angles and programmable settings, it can be easily customised to meet specific product and portioning requirements. Ideal for bakeries, confectionery manufacturers, and dairy processing units, it is a perfect solution for modern, large-scale, and automated food production environments.

SPECIFICATION

Operating Temperature During Cutting	5°C to +10°C
Cutting Shape	Squares, Rectangles, Round, Triangle
Cutting Tray Size	Tray 600 mm x 600 mm x 60 mm
Capacity	High cutting efficiency and fastest with 2 knife
Frequency	20 kHz
Watts	2 KW (Each Cutter)
Voltage	AC 230 V, 50/60 Hz, 16 Amp
Cutting Length	610 mm
Ultrasonic Knife	305 mm x 2 pieces
Cutter Material	Titanium (Food Grade)
Cutting Height	Up to 70 mm
Power Consumption	5 KW
Cutter Type	Standard

Cutting Shape & Tray Size

Cutting Base Plate	600 mm X 600 mm
Cutting Shape 1	Square
Cutting Shape 2	Rectangle
Cutting Shape 3	Round
Cutting Shape 4	Triangle
Touch Panel & Controller	7" HMI & Touch Screen Display
High/low Voltage Protection	Available
Safety Operation	Light Curtain

FEATURES

1. Equipped with Advanced Sensor Technology
2. Flexible Cutting Options
3. Multiple Shape Cutting Capability
4. Custom Cutting for Every Shape
5. Maintains Texture & Moisture
6. High-Speed & Automation Ready
